

Tohoku Takunka Academy (TTA) is based in Sendai, reknown as an academic city, where the beauty of nature and city functions come together. TTA was launched in April of 2010 with the aim of promoting widespread multicultural exchange through the reception and support of foreign students.

Our basic mission includes globally transmitting information of schools in the Tohoku area (especially the academic city of Sendai), as well as receiving and supporting foreign students at the post-graduate level. We also engage in promoting cooperation between overseas and domestic academic institutions, and in supporting high-level overseas students with recruitment, entry to Japan, Japanese language education (at the technical level), admissions, and job-hunting.

KEYAKI –Japanese Language And Culture Program has been held since 2011, and every year many students participate from all over the world. With the KEYAKI –Japanese Language And Culture Program, you can gain a detailed understanding of Japanese universities through Japanese language lessons, visits to university research facilities, and exchanges with Japanese students. You can also deepen your understanding of Japanese culture through first-hand experience.

This year's KEYAKI –Japanese Language And Culture Program will take place in the two weeks between Jul 28th - Aug 10th 2024. Students approved by Tohoku University may participate as Tohoku University special visiting trainees .
