

Tohoku Takunka Academy (TTA) is based in Sendai, reknown as an academic city, where the beauty of nature and city functions come together. TTA was launched in April of 2010 with the aim of promoting widespread multicultural exchange through the reception and support of foreign students. The members of the board as well as the director of our foundation are all teachers at Sendai's universities.

Our basic mission includes globally transmitting information of schools in the Tohoku area (especially the academic city of Sendai), as well as receiving and supporting foreign students at the post-graduate level. We also engage in promoting cooperation between overseas and domestic academic institutions, and in supporting high-level overseas students with recruitment, entry to Japan, Japanese language education (at the technical level), admissions, and job-hunting.

TTA short-term study abroad program has been held since 2011, and every year many students participate from all over the world. With the TTA short-term study abroad program, you can gain a detailed understanding of Japanese universities through Japanese language lessons, visits to university research facilities, and exchanges with Japanese students. You can also deepen your understanding of Japanese culture through first-hand experience.

This year's TTA short-term study abroad program will take place in 10 days between Feb 8th - Feb 17th 2018. Students approved by Tohoku University may participate as Tohoku University special visiting trainees .
